10
1970

VOLUME 10, 1970

PERGAMON PRESS
OXFORD : NEW YORK : BRAUNSCHWEIG

U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of
Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki
Published bi-monthly by Pergamon Press

HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

Scientific Translation Editor:
R. C. Glass, M.A., M.Sc.,
The City University, St. John Street, London, E.C.1.

Translators: J. Berry, D. E. Brown and H. F. Cleaves

Publishing, Subscription and Advertising Office:
Pergamon Press Ltd., Headington Hill Hall, Oxford, OX3 0BW

Annual subscription rate £60 ($150)
Subscriptions are only serviced after payment has been received and are not accepted for less than one year.
Orders should be sent to the distributors at either of the following addresses:
Headington Hill Hall, Oxford, OX3 0BW
Maxwell House, Fairview Park, Elmsford, N.Y. 10523

Microform Subscriptions & Back Issues
Current subscriptions on microfiche and microfilm, and back files on microfilm as well as back issues in the regular editions of all previously published volumes are available from our sole distributor, Microforms International Marketing Corporation Inc. (MicroMark) at the most convenient address:
Cowper House, Olney, Bucks., England
Fairview Park, Elmsford, New York 10523, U.S.A.

LIST OF CONTENTS

Number 1

PAGE

B. I. KURLIN: Solution of the chebyshev approximation problem for an incompatible set of nonlinear equations . . . 1
F. P. VASIL'EV: Conditions for a saddle-point to exist in determinate integro–differential games involving delay and parameters . . . 17
V. F. DEM'YANOV: Differentiation of the maximin function. III . . . 31
YU. B. GERMEIER: The constrained maximin problem . . . 49
G. K. ZAKHAROV and V. I. PLOTNIKOV: Optimal processes with two groups of control parameters . . . 70
I. A. VATEL' and A. F. KONONENKO: A numerical scheme for solving optimal control problems . . . 85
N. B. KONYUKHOVA: On numerical isolation of the solutions tending to zero at infinity of certain two-dimensional non-linear sets of ordinary differential equations . . . 95
S. I. SERDYUKOVA: On the unconditional uniform stability of a finite difference scheme for the equation $u_t + u_x = 0$ . . . 112
A. A. TUZHILIN: Asymptotic expansions of solutions of wave diffraction problems in angular and wedge-shaped regions . . . 126
I. A. ADAMSKAYA: A spherical harmonic method in the problem of the solution of a kinetic equation for axially symmetric infinite cylinders . . . 147
A. P. BYRKIN and V. V. SHCHENNIKOV: A numerical method of calculating a laminar boundary layer . . . 161

Short Communications

V. A. TUZOV: Graph-schemes with associative calculus . . . 172
I. F. GANZHELA: An algorithm of descent with constraints . . . 191
A. D. IOFFE and D. B. YUDIN: Some non-linear problems of stochastic programming . . . 207
KH. D. IKRAMOV: Some estimates for the eigenvalues of matrices . . . 226
V. I. GORDONOVA: The effective use of fixed point calculations in solving systems of linear algebraic equations . . . 234
N. YU. SHIRIKOVA: The best approximation polynomial formula obtained by means of a computer . . . 241
G. I. NATANSON and V. V. GLAGOVSKII: Some notes on the roots of ultraspherical polynomials . . . 244
L. N. DOBRODEEV: Cubature formulas of the seventh order of accuracy for a hypersphere and a hypercube . . . 252
D. G. SANIKIDZE: The convergence of a quadrature process for certain singular integrals . . . 254
N. V. SLONOVSKII: The asymptotic expansion of the hankel transformation of functions which have branch points . . . 265
G. G. ABEZGAUZ: The probabilities of falling into a circle and a sphere with a normal distribution . . . 270
V. N. STRAKHOV: A method for the approximate solution of incorrect linear problems . . . 277
A. B. BAKUSHINSKII: The extension of the error principle . . . 288
V. M. VERZHBITSKII and Z. B. TSALYUK: An approximate method for finding a resolvent . . . 294
V. B. GINDES: A method of successive approximations for the solution of linear problems of optimal control . . . 297
V. I. KOROBOV: Sets of accessibility . . . 308
A. N. ZHERNAK: A means of determining the stability of numerical methods of integration for equations with periodic coefficients . . . 319
YU. YA. MIKHAILOV: The organization of the pivot method for an implicit scheme . . . 323
V. S. RYABEN'KII: Heat conduction in a system of rods . . . 328
L. N. BUSURINA, V. YA. GOL'DIN, N. N. KALITKIN and L. S. TSAREVA: A numerical calculation of detonation . . . 333
A. KH. RAKHMATULINA: The asymptotic of the non-stationary transport equation with anisotropic dispersion . . . 340
V. L. GENEROZOV, V. L. KOLOMENSKII, V. G. KUZNETSOV and V. A. SAKOVICH: Application of the Monte-Carlo method to calculate the risk of exceeding a given dose of protons from solar flares . . . 347

Vol. 10 1970

PAGE

N. T. STEL'MASHUK: Solutions of Maxwell's system of equations 352
V. M. BORISOV: The structure of a non-equilibrium ionization front in a gas 356
V. A. BASHKIN: Calculation of the laminar boundary layer for sharp elliptic cones in a supersonic flow with zero angle of attack 360
F. ASADOV: The numerical solution of a mixed boundary value problem for the bending of rectangular plates of constant thickness 367
YU. N. KONDYURIN: The simulation of random variables by the superposition method . 372

Letters to the Editor

A note on "Tables for the solution of the Laplace equation in elliptic regions" 379
Note on the paper "The Cauchy problem in the theory of pursuit" 381
Book Reviews 382

Number 2

The Lenin Centenary 1
M. V. FEDORYUK: The stationary phase method in the multidimensional case. Contribution from the region boundary 4
V. A. KARATYGIN and V. A. ROZOV: The stationary phase method for a definite integral when the stationary point may be located anywhere in the interval of integration 24
M. M. AGREST: Evaulation of incomplete cylindrical functions 41
L. T. POZNYAK: The rate of convergence of the Bazley–Fox method of intermediate problems in the generalized eigenvalue problem of the form $Au-\lambda Cu$ 56
V. B. UVAROV: Asymptotic properties of the solutions of integral equations whose kernels $K(x,s)$ vanish when $x-s-a$ 75
A. KH. OSTROMOGIL'SKII: On the uniqueness of the solution of the converse problem in potential theory 91
V. F. LAZUTKIN: Eigenfunctions with a given caustic 105
A. A. TUZHILIN: Asymptotic expansion of the solution of the radiation problem for the oscillating boundaries of a wedge 121
B. V. PAL'TSEV: Convergence of expansions with respect to a small parameter introduced into the boundary conditions of the solutions of a boundary value problem for the Navier–Stokes equations 133
O. M. BELOTSERKOVSKII, F. D. POPOV, A. I. TOLSTYKH, V. N. FOMIN and A. S. KHOLODOV: Numerical solution of some problems in gas dynamics 158
P. A. KALINCHENKO, I. S. LUPASHINA, V. A. MAKAROV, A. S. MARKOV, I. V. POPOVA and S. N. SOKOLOV: Report on a monitoring system of programming automation and a translator from FORTRAN for the MINSK-22 computer 178

Short Communications

V. N. KUBLANOVSKAYA: Application of orthogonal transformations to the numerical realization of linear algebraic perturbation problems 193
E. P. VEDENEEV, N. P. ZHIDKOV and B. M. SHCHEDRIN: Differentiation of a tabular function by the method of interpolating conjugation 200
G. N. PYKHTEEV and I. SHOKAMOLOV: Interpolated quadrature formulae containing derivatives for some Cauchy type integrals and for their principal values 208
I. P. MYSOVSKIKH: Cubature formulae and orthogonal polynomials 219
V. V. IVANOV: Analysis of the accuracy of computational algorithms 224
A. V. CHECHKIN: A. N. Tikhonov's special regularizer for integral equations of the first kind 234
YU. B. GERMEIER: Discrete maximum principle in maximum determination problems . 247
S. S. GAISARYAN: The choice of optimal networks for the numerical solution of the Cauchy problem for a set of ordinary differential equations 253
I. V. FRYAZINOV: An algorithm for the solution of difference problems by graphs . . 268
E. S. NIKOLAEV: The stability of the pivotal condensation method for realizing difference schemes for equations of heat conduction and vibrations 274
G. V. MELADZE: Schemes for increasing the order of accuracy for sets of elliptic and parabolic equations 281
V. I. IVANOV: The calculation of corrections to geometrical optics I. An electromagnetic problem 295
B. D. MONSEENKO and B. L. ROZHDESTENSKII: The numerical solution of the stationary equations of hydrodynamics with tangential discontinuities 308
V. E. SHAMANSKII: The numerical solution of problems on unsteady filtering with free surfaces for the liquid 318
A. P. KOSYKH and A. N. MINAILOS: Explicit schemes for the establishment method in the problem of the supersonic flow round a blunt body 332

PAGE

A. I. ZABEIDA and V. T. KIREEV: "Internal" shock waves caused by non-equilibrium of chemical reactions 342
O. M. KASTIN: The use of ALGOL 60 for the solution of logical problems 351
V. V. LUTSIKOVICH: The idea of a function in ALGOL 60 357
L. A. GUTNIK: Looping in linear programming 361
Book Reviews 373

Number 3

N. S. BAKHVALOV: Properties of optimal methods for the solution of problems of mathematical physics 1
B. ALIEV: Regularising algorithms for finding a stable normal solution for an equation of the second kind on a spectrum 20
V. N. MALOZEMOV: The best uniform approximation for functions of several arguments 28
V. F. DEM'YANOV: The solution of minimaximin problems 44
A. A. TOLSTONOGOV: Properties of a function of a maximum with constraints . . 56
FAM KHYU SHAK: The theory of optimal control by discrete processes 68
YA. M. BERSHCHANSKII: A method of solving linear and convex programming problems 85
B. M. BUDAK and A. I. IVANOV: Difference approximations for differential games . . 96
G. SHTOYAN: Some economical additive schemes for solving boundary value problems for multi-dimensional parabolic equations 113
F. G. CHEVEMISIN: Numerical solution of a kinetic Boltzmann equation for homogeneous stationary gas flows 125
V. G. LEVICH, E. M. PODGAETSKII and V. YU. FILINOVSKII: A successive approximation method for solving a non-linear Volterra integral equation of the second kind . 138
V. P. IVANOV: Solution of the problem of the diffraction of a plane wave by a periodic lattice 146
R. T. DYLDINA and V. A. ENAL'SKII: Choice of optimal parameters in solving a difference analogue of Dirichlet's problem in cylindrical geometry 160
S. A. MASALOV and V. G. SOLOGUB: Exact solution of the problem of the diffraction of an electromagnetic wave at a strip structure 169
E. KH. TYUGU: Solution of probelms using computational models 193
G. A. MIKHAILOV and M. A. NAZARALIEV: Optimization of the estimation of functional relationships by the Monte Carlo method 213

Short Communications

V. N. GALIMULLIN, P. V. ROMANOV and A. S. ROSHAL: Representation of a function, specified at equidistant base-points, by a trigonometric polynomial 221
YU. TS. BOGLAEV: Smoothing of the optimal solution in a control problem 226
G. V. MELADZE: An improved two-layer scheme for sets of parabolic equations with constant coefficients 231
I. V. KONOVAL'TSEV: Some properties of a bilinear operator occurring in the theory of finite difference schemes 239
V. G. VASIL'EV and G. A. ISAEV: On the solution of the inverse one-dimensional problem of electromagnetic sounding theory 247
E. A. POLYANSKII: On a boundary value problem for Schrödinger's equation 251
A. A. SHKURPELOV, S. B. SHIKHOV and YU. I. ERSHOV: Solution of the single-velocity kinetic equation of neutron transport in spherical geometry with scatter indicatrix linearly dependent on the angle 257
YU. P. POPOV and A. A. SAMARSKII: Completely conservative difference schemes for the equations of gas dynamics in Euler's variables 265
A. KH. OSTROMOGIL'SKII: On the uniqueness of the solution of an inverse problem for the dynamic equations of elasticity theory 274
B. V. PAL'TSEV: Convergence of the method of successive approximations with split boundary conditions when solving the boundary value problem for the Navier–Stokes equations . . 282
B. V. ALEKSEEV and V. P. YANOVSKII: Numerical computation of the relaxation of a reacting gas with a particle sink 288
F. F. ATSTOPAS and K. I. PLUKAS: A matrix method for finding the ranks and regularly numbering the vertices of a flow graph 295
Scientific Information: The second all-union conference on Monte Carlo methods . . 301
Book Reviews 303
